ANGELIQUE

Designed for discerning custom frame shops and interior designers, the Angelique collection redefines the boundaries of transitional framing. This exquisite series breathes new life into a timeless silhouette by pairing a sleek, modernized scoop profile with the rich textures of old-world metal finishes. Crafted in Italy, the collection balances a slim 3/4-inch width with a striking 1 1/4-inch tall profile, offering the clean, architectural lines demanded by contemporary spaces while retaining the substantive weight of luxury design.

The brilliance of Angelique lies in its versatile, hand-applied finishes that seamlessly bridge classical elegance and modern sophistication. Available in Antique Gold, Antique Silver, Antique Bronze, and Antique Black, each moulding features subtle distressing and nuanced undertones that capture the light beautifully. This sophisticated patina allows designers to effortlessly anchor artwork across diverse environments—from ultra-modern minimalist lofts to warm layered traditional interiors—making it an indispensable asset for your high-end design library.

Incorporate Angelique into your showroom to offer clients an elevated, bespoke framing option that showcases elegant European craftsmanship through a decidedly current lens. Elevate your design portfolio and captivate your clientele with Angelique—a sublime fusion of heritage artistry and transitional perfection.

Featuring a sleek, modernized scoop profile—measuring a refined 3/4" wide by 1 1/4" high—the collection provides clean, architectural lines that showcase both modern pieces, like this abstract print from *Desenio*, as well as more traditional media and artwork. Each finish boasts a sophisticated patina and subtle distressing that captures light beautifully. In turn, this creates a warm neutral palette that is tailor-made for today's modern interior design schemes but is equally well-suited for traditional and classic design motifs. ▷
