Thin Is In ▷

Today's trend in thin profiles are seen not only in our industry, but also in the aesthetics of our technology, interior design, and case goods. Designers seeking narrow silhouettes that possess a bit more character and sophistication than a square profile, will find a terrific option in Ascend's slender sleekness.

ASCEND COLLECTION

Ascend is a new modern collection of geometric mouldings featuring four metallic finishes of gold, silver, bronze, and slate.

The collection's signature characteristic is its knife edge profile, creating a dramatic silhouette. The 2" tall back cuts an acute 26-degree angle towards the artwork, and the thin peak delivers the reflections and highlights of the metal finish.

Ascend is made in Italy, exhibiting artisan craftsmanship that is universally renowned. The metal finishes are contrasted with a matte satin finish on the inside slope and the bright reflective crest at its point, enhancing the collection's sharp lines.

This collection is modern to its core; with classic sensibilities to mid-century modern geometric simplicity and severe linear attributes. It provides great picture framing solutions to both modern and transitional art, abstract and impressionist motifs, as well as graphic art and photography.

The Ascend Collection is handmade in Italy
