84388 • 1/2" Gold/Blue quarter round profile, 5/8" rabbet

CORONA COLLECTION

Corona is a new collection of 6 contemporary gilded quarter-round mouldings, embellished with colorful brush lines upon the crest of the profile face.

The collection features petite profiles, but its features are stately. Starting from the outside in, the back edge of the moulding is finished in eggshell white, creating a contrasting highlight drawing the face of the frame out from the wall. The luster of gold is highly reflective on its rounded silhouette, catching light at every angle, and balancing the rubbed band of color in its center.

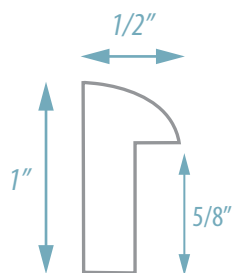

Corona is made in Italy, and showcases the richness of hand-applied finishing. Fine brush lines provide luster and depth revealing the painted color accents to create a balanced overall composition.

This collection is ideal for framing small works as well as pieces that call for enhancing elements of color within the artwork. The delicate profile also makes an excellent inner-frame liner facilitating highly creative custom frame projects.

From photography to fine art, this group of mouldings can serve as a beautiful picture framing solution for framers and designers looking for classic simplicity with time-honored craftsmanship.

The Corona Collection is handmade in Italy

Bright Idea ▷

Corona's lustrous gold face is brilliantly contrasted by its bright white back edge. This makes the frame visually pop off of the wall, as well as blending the side of the frame with light colored walls. Details are what sets this collection apart, and for a narrow profile set, it helps make more of a statement while creating a chic overall design.
