Ferro

The Ferro Collection, expertly handcrafted in Italy, represents the pinnacle of modern sophistication for discerning interiors. This collection seamlessly blends old-world craftsmanship with a contemporary minimalist silhouette, offering a versatile aesthetic that feels both architectural and organic.

Its refined square profile is designed to provide a clean, structured border that elevates without overshadowing, making it an ideal choice for both modern and traditional works such as lithography, watercolor paintings, drawings, photography, decorative prints or high-end gallery presentations.

The defining characteristic of the Ferro series is its nuanced metallic finish, which features a complex, multi-tonal patina reminiscent of weathered iron, industrial steel, aged copper and gold. This tactile surface catches the light with a soft, matte luster, revealing delicate textures and hand-applied distressing that add depth and character to every piece. By combining this raw, industrial-inspired edge with a sleek, modern form, the Ferro Collection brings a touch of Italian luxury and timeless style to any professional or residential project.

The collection features two versatile profile widths of 3/4" and 1 1/8" to suit both delicate works on paper and larger scaled pieces.

Digital print, painting (right) **Abstrakte Komposition**, Linda Söber c.1953 >

Designed for high-end gallery presentations and sophisticated residential interiors, Ferro offers a clean, architectural silhouette that offers bold but elegant impact for many genres of art.
